Past Organization for Nuclear Data Evaluation in Japan

Tsuneo NAKAGAWA

Japan Atomic Energy Agency

Nuclear data activities in Japan were started by organizing Japanese Nuclear Data Committee (JNDC) in 1963. The Nuclear Data Laboratory (former organization of the Nuclear Data Center) was organized in JAERI in 1968. Since then, successful cooperation between JNDC and the Nuclear Data Center has been continued. As a result, these organizations have created various versions of Japanese Evaluated Nuclear Data Library (JENDL). The present talk will review such organizations mainly for nuclear data evaluation work.
